

Jet-Air®

HYDROTHERAPY FITTING

WHITE GOODS

Increase Water Action for Optimum Relaxation

The Jet-Air Deluxe Hydrotherapy fitting offers outstanding performance for air/water jet action by utilizing a special internal venturi design.

Intended for "in the wall" or "in the pool" installation and utilizes a versatile air vent system to draw air from the deck or pool wall. For added convenience the jet air nozzle is removable from the pool interior for easy servicing.

Operation of the Jet-Air is simple by turning the air supply tube adjustment cap allowing a larger air opening for increased air volume into the water jet stream.

The Jet-Air fitting adds invigorating spa therapy action for an extra enjoyable pool experience in private or public pools.
